PROFILE

Computer Science undergraduate and aspiring Software Engineer with hands-on experience in full-stack web development, Java systems design, and applied AI. Skilled in developing responsive web applications using React and Next.js, and backend services using Python, FastAPI, and Java. Interested in building scalable software solutions and AI-assisted applications.

TECHNICAL SKILLS

Programming Languages	: Python, Java, JavaScript
Web Technologies	: React, Next.js, FastAPI, Node.js, Tailwind CSS, HTML, CSS, PHP
Database Management	: PostgreSQL, MySQL
Cloud & Platforms	: Microsoft Azure, Vercel, Render, Neon
Development Tools	: Git, GitHub, MS Office Suite

PROJECTS

University Second-Hand Marketplace **2026**

React, Python, FastAPI, PostgreSQL

Designed and developed a full-stack marketplace platform for university students. Implemented a React frontend, JWT-secured FastAPI backend, and PostgreSQL database. Deployed the frontend on Vercel, backend on Render, and database on Neon with Cloudinary image storage.

GitHub

Kurbani Cattle Hut Management System **2024**

Java, Object-Oriented Programming, Maven

Developed a Java desktop application to manage seasonal cattle-market operations, including seller information, inventory, and transaction records. Replaced manual paper-based processes with structured digital record management.

GitHub

My Own Alexa **2023**

Python, Speech Recognition

Built a Python-based personal voice assistant capable of interpreting spoken commands and responding to everyday queries. Released as an open-source, MIT-licensed learning project for developers exploring speech-driven applications.

GitHub

Agri Inventory Dashboard **2023**

HTML, CSS, JavaScript, PHP

Developed an agricultural inventory-tracking dashboard for managing stock information and monitoring inventory. Published the project as open-source software under the MIT license.
